CARPETA 1: LA ESFERA CELESTE
TRANSPARENCIA 16: ¿DÓNDE ESTAMOS?

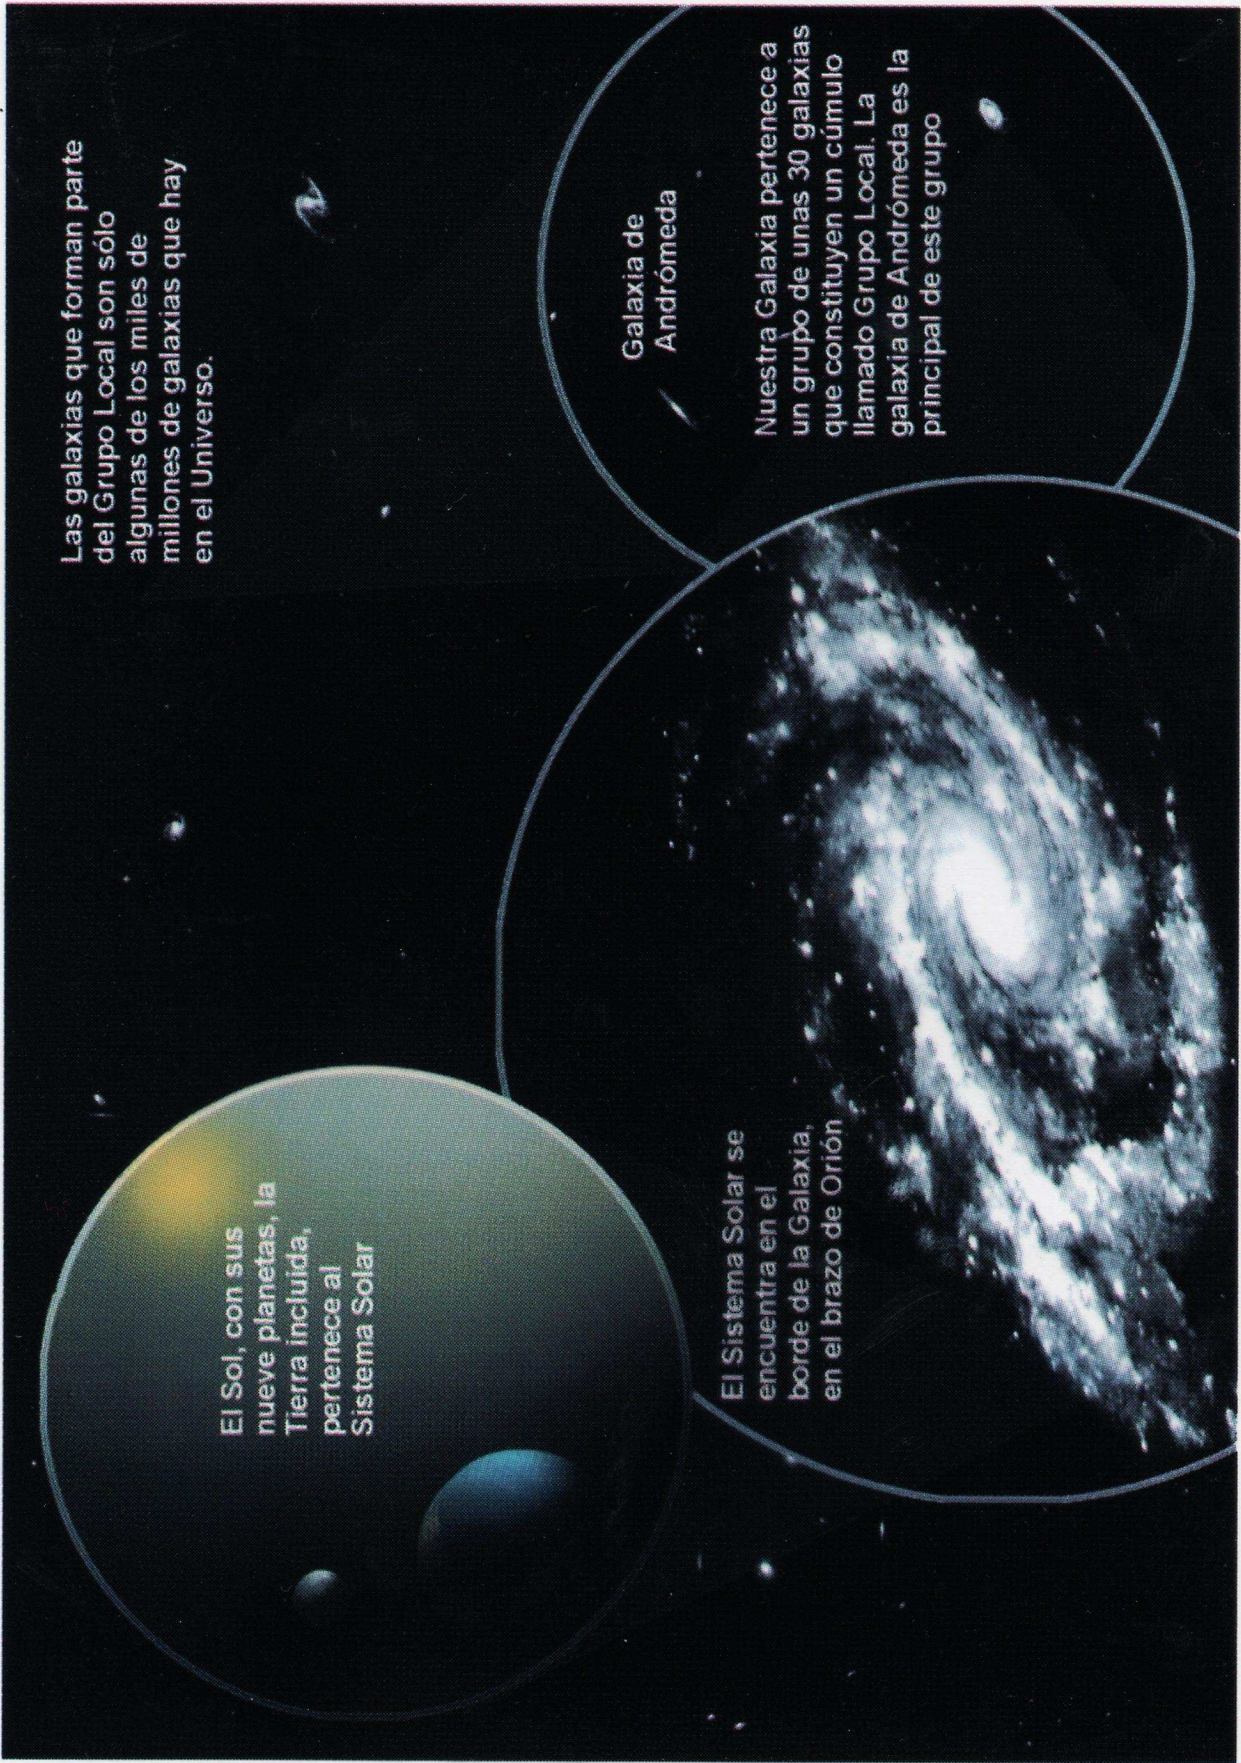

Las galaxias que forman parte del Grupo Local son sólo algunas de los miles de millones de galaxias que hay en el Universo.

Galaxia de Andrómeda

Nuestra Galaxia pertenece a un grupo de unas 30 galaxias que constituyen un cúmulo llamado Grupo Local. La galaxia de Andrómeda es la principal de este grupo

El Sol, con sus nueve planetas, la Tierra incluida, pertenece al Sistema Solar

El Sistema Solar se encuentra en el borde de la Galaxia, en el brazo de Orión

CARPETA 1: LA ESFERA CELESTE
TRANSPARENCIA 17: EL UNIVERSO Y SU COSMOLOGÍA

| Galaxia, parte del cúmulo de: | Distancia (Mpc) | Comentario hacia el rojo |
|--|-----------------|---|
|  Virgo | 24 | H + K  1200 km/s |
|  Ursa Major | 300 |  15 000 km/s |
|  Corona Borealis | 430 |  22 000 km/s |
|  Bootes | 770 |  39 000 km/s |
|  Hydra | 1200 |  61 000 km/s |
