Geometry, Málaga (Spain)

Doing magic

The Wizard of Lorentzian Meetings

Someone is surely thinking what is this about?

I'm sure that more than once we have seen a magician getting the most unexpected things in a hat, tapping with a magic wand or saying ABRACADABRA and pulling a bunny?

In this nice evening, we will try to find our special bunny.

After a series of sophisticated talks, full of theorems and very formal things, we pretend to relax the atmosphere and have a good time.

In just a while you will see the result.
