Gateley Ward  
Ext: 5964/2505

To whom it may concern,

This 50 year old gentleman sustained fracture  
dislocation of Right Elbow and Right head of radius  
following a fall, while he is on holidays in England.

Findings: \* Committal fracture → fixed in cancellous screw  
Gusser band wire

\* Radial head 30% (unable to reconstitute)  
radial head fragments excised.

\* Labral collateral ligament stripped from ulna -  
repaired w/ mitek anchors.

Postop Res 12/7, post cast 4/5/2; then mobilise.

Thank you

Dr S. Fernando - Fellow Orthopaedics.

RSOS CASE No. 351902

**PATIENT DETAILS:**

ENRIQUE MARIA ARNALDOS PAYA

CONSULTANT : MR CHOJNOWSKI A

Date of Birth : 23/05/1957

SURGEON : MR CHOJNOWSKI A

Hospital number : 1593862

ASSISTANT(S) : S/A WILLIAMS MILLIE

NHS Number :

**OP. DETAILS**

ANAESTHETIST(S) DR WOOLLAM C

DR.

DR EVANS, O

DATE : 03/08/2007

**PROCEDURE(S)**

**1) INT FIXATION # ELBOW**

**INDICATION** : Right elbow fracture dislocation - posterolateral instability  
: olecranon fracture (comminuted) - radial head fracture 30% - comminuted

**INCISION** : longitudinal posterior

**FINDINGS** : olecranon fracture - comminuted  
: radial head fracture 30% (unable to reconstruct)  
: lateral collateral ligament stripped from ulna  
: 3mm piece of distal humero-ulna articulation avulsed  
: comminution coronoid process

**PROCEDURE** : washout  
: radial head fragments excised  
: olecranon fracture fixed 1x cancellous screw 30mm AO small fragment  
: tension band wire  
: lateral collateral ligament repaired with mitek anchors  
: elbow stable 10 degs - full flexion  
: decision to treat in POP

**CLOSURE** : 1 ethibond ligament  
: 1 vicryl deep  
: 2/0 vicryl fat  
: 4/0 nylon skin  
: gelonet - dressings - velband - POP slab - 90 degs neutral

**POST OP** : iv AB's x1 post op  
: TGH in sling after completion of cast marne  
: in spain needs ROS 12/7 and POP cast 4/52 then mobilise  
: beware instability!!! - would need lareral collat lig reconstruction ? radial head replacement
